

COOPERATIVE EUROPEAN GRAPEVINE MOTH (EGVM) QUARANTINE PROJECT COMPLIANCE AGREEMENT

EXHIBIT G2- GROWER/ PRODUCER/ MANAGER OF VINEYARD OR ORCHARD/GROVE: *Farmers' Markets, Swap Meets, and Roadside Vendors*

Provisions for the Intrastate Movement of Fresh Fruit Produced Inside the EGVM State Interior Quarantine Area

Establishment shall only move regulated articles ***within or from*** the area quarantined for EGVM when complying with ***all*** of the following:

1. Implement an Integrated Pest Management (IPM) program targeting EGVM as outlined by the United States Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) (http://www.aphis.usda.gov/plant_health/plant_pest_info/eg_moth/index.shtml), the Project, and/or the University of California Cooperative Extension. All IPM treatment records must be retained for a period of three years. Such records shall be made available to the Project upon request.
2. **For grapes (*Vitis* sp.):**
 - a) Allow the Project to place and service traps on the growing premises for the detection of EGVM at intervals determined by the Project.
 - b) Each growing premise must be inspected and found free from EGVM no earlier than two weeks (14 days) prior to initial harvest and every two weeks thereafter as long as harvesting continues.
 - c) All EGVM host fruit leaving the growing premise must be accompanied by a copy of the Certificate of Quarantine Compliance (CQC) issued at the time of the inspection.
3. **For EGVM host fruit other than grapes:**
 - a) Each growing premise must be inspected and found free from EGVM no earlier than 30 days prior to initial harvest and every 30 days thereafter as long as harvesting continues.
 - b) All EGVM host fruit leaving the growing premise must be accompanied by a copy of the CQC issued at the time of the inspection.
4. Request for inspection must be submitted to the Project no less than 72 hours prior to harvest.
5. Grower will provide the services for removal of fruit for inspection. Fruit within each vineyard/orchard/grove will be randomly selected for inspection as directed by the Project.
6. Grapes must receive a Project approved **post-harvest treatment*** when harvested from any vineyard:
 - a) with EGVM detected by trapping or inspection within the last three EGVM generations, **or**
 - b) located within 200 meters from the boundary of a vineyard with EGVM detected by trapping or inspection within the last three EGVM generations, **or**
 - c) located within 200 meters of an EGVM detection by trapping or inspection within the last three EGVM generations (including find sites in residential areas, orchards, fields, groves, etc.), **or**
 - d) located within 500 meters from the boundary of a vineyard with EGVM detected by trapping or inspection within the last three EGVM generations where mating disruption is being used, **or**
 - e) located within 500 meters of an EGVM detection by trapping or inspection within the last three EGVM generations (including find sites in residential areas, orchards, fields, groves, etc.) where mating disruption is being used.

Fruit (other than grapes) grown in an orchard/grove where an EGVM has been detected by **trapping** does not need to receive a **post-harvest treatment*** approved by the Project.

Fruit (other than grapes) grown in an orchard/grove where an EGVM has been detected by **inspection** must receive a **post-harvest treatment*** approved by the Project.

7. Fruit subject to treatment does not qualify for movement under the provisions of this compliance agreement exhibit.

*Farmers' Markets, Swap Meets, and Roadside Vendors***

8. Samples requiring **Brix analysis** by a lab located **inside** the EGVM quarantine area must be shipped to an Approved Lab (Form 66-105) **or** shipped in accordance with Master Permit 1308* to a lab operating in accordance with Master Permit 1308*.
9. Samples requiring **Brix analysis** by a lab located **outside** the EGVM quarantine area must be shipped to an Approved Lab (66-105).
10. Samples of regulated plants or plant parts requiring **destructive lab analysis** (such as pesticide residue, nutrient or mineral analysis) must be submitted to an Approved Lab (66-105) located **inside** or **outside** the EGVM quarantine area.
11. Samples of regulated plants or plant parts requiring **disease/pest research or diagnostics** must be submitted to a lab with a valid State plant pest permit (66-026) and samples may be:
 - a) collected and moved by a lab employee with a copy of the permit in their possession if authorized by the permit, **or**
 - b) collected and shipped in accordance with Master Permit QC 1308*.
12. Ensure all equipment (i.e., bins, barrels, machinery, etc.) used for vineyard/orchard/grove maintenance and harvesting is thoroughly cleaned of all host material and debris year-round **and** prior to leaving the growing premise.
13. No growing equipment (such as stakes and poles) may be removed from the growing premise unless the equipment:
 - a) has been stored on the property no less than 60 feet away from any EGVM host material for a minimum of nine months prior to relocation, or
 - b) is going directly to a landfill located **within** the quarantine area, or
 - c) is handled in a method approved by the Project (see "special instructions" below).
14. Ensure all **vineyard/orchard/grove planting and removal*** is conducted by an establishment under compliance with the Project.
15. The Exterior of all vehicles/conveyances used in the transport of EGVM host material from the growing premise must be free from all host material debris prior to leaving the growing premise.
16. Green waste includes culled or discarded fruit, fruit skins, leaves/branches, stems, vines, foliage, grape spurs and canes, unfermented pomace, winery and harvesting waste, home garden waste, grass clippings, space trimmings, weeds or other vegetative material, etc.

In orchards/groves where:

- a) EGVM has been detected, all green waste shall be handled as prescribed in Appendix 1 or as specified below (see "special instructions").
- b) fruit has been inspected and a CQC has been issued, green waste associated with the inspected fruit may move **intrastate** (within California) without further restriction and **can not be moved interstate**.

In vineyards and all green waste associated with grapes shall be handled as prescribed in Appendix 1 or as specified below (see "special instructions").

Appendix 1 is available online at: http://www.cdfa.ca.gov/phpps/PE/InteriorExclusion/egvm_quarantine.html

17. Ensure all employees receive training to be compliant with all specifications of this compliance agreement exhibit.

***Project approved planting and removal establishments, post-harvest treatments and establishments under compliance with Master Permit QC 1308 can be verified online at:**

http://www.cdfa.ca.gov/phpps/PE/InteriorExclusion/egvm_quarantine.html

EGVM host fruit found to be in violation of the above stipulations are subject to being held, rejected, destroyed, or subject to other prescribed actions at the discretion of the Project.
